Sebastian:

As we get closer to the sampling date, we will have more specifics. However, in the past we have typically been on-site between 6:30 – 7:00 AM to start the indoor air sampling. The main issue is the Aspire Daycare at Suite 135C – as we are sampling during a regular business day, we have been setting up and retrieving the canisters early in the morning before the staff/children show up. The staff knows to leave the canisters alone during the day. So the plan would be on Thursday to setup the canisters in Suite 135C first, then do Suite 140A and the outdoor control sample. Once Building 100 is done, we would move to Elliott Landing. On Friday, we remove the canisters in the same order as they were set up. As you know, it does not take long to set up an air canister for sample collection, and as we have been sampling Suites 135C and 140A multiple times, we are normally finished setting up a full Suite space in 10-15 minutes. Elliott Landing will take a bit longer as we have not collected indoor air samples before – just soil gas. So we will relocate the soil gas points and find a convenient place to setup an air canister near these points.

Thank you, Craig.

I would like to be present for at least one of the days of indoor air sampling- either the 8th or 9th of August. Could you provide some more information on when exactly this sampling is to begin (time of day)? I understand that some details for this event are still being worked out, so if that hasn't been figured out yet, please just keep me in the loop.

-Sebastian

Subject: Notice of sampling

Hi Sebastian – Hope your summer is going well.

Wanted to let you know that we intend to conduct indoor air and soil gas sampling at Cummings Center (Building 100 and Elliott Landing) on August 8-10, 2019. Our current plan is to do the indoor air sampling on Thursday and Friday (August 8-9) and to do the soil gas sampling on Saturday (August 10).

Please let me know if you have any questions and whether EPA plans to attend.

Thanks very much.

Best,

Craig
